

## FOCUS ON SECURITY SIGNATURE FORM FOR CONTRACTORS

At the Port of Aarhus, we focus on security. The security leaflet, "To be on the safe side", briefly describes how you and your employees should behave when your company solves tasks at the Port of Aarhus. We will ask you to read the leaflet thoroughly and possibly contact us if you are left with unanswered questions. You can find the security leaflet on our website under: "[Publications](#)".

Your employees and subcontractors must be instructed in the security rules that apply at the port before they are sent on assignments at the Port of Aarhus.

We expect your employees and subcontractors to be equipped with the necessary protective equipment when they arrive at the port to solve a task - large or small.

We will ask you to return this letter in signed condition so that we are sure that the above applies to our future cooperation.

Kind regards,

the Port of Aarhus

The undersigned has read and understood the leaflet on security at the Port of Aarhus. I confirm that those of my employees and subcontractors who are to carry out tasks at the port will always be instructed in the applicable security rules and that they will use the necessary and approved protective equipment.
